

### Accessory

The SafeHome Wireless Alarm system can be divided into 8 zones – each with an unlimited amount of sensors, sirens and dial-up units.

Customize your alarm to fit your needs!

## 4-button Remote Control

### Accessory for Wireless Alarm System WS500S

With the SafeHome Wireless Remote Control the alarmsystem can easily be armed and disarmed from a distance without the use of a PIN code. No need for placing the controlpanel near an entrance, and the user are instead able to use a location farther away from the burgler's entrypoint.

Additionally, the remote controls can trigger the alarmsystem's panic function and can with great advantage be placed in locations from where the panic function is obvious to be used.

This being the bedroom in case the sound of burglary awakens the residents or the bathroom which is the obvious refuge during robberies since the lock is equipped with a lock.

The SafeHome Wireless Remote Controls are easily and quickly paired with the controlpanel.

## HOTLINE SUPPORT • YOUTUBE • FACEBOOK

Med en SafeHome Trådløs Fjernbetjening kan det trådløse alarmsystem til-/ frakobles på afstand uden brug af PIN kode. Det er derfor ikke nødvendigt med montering af kontrolpanelet i nærheden af indgangsdøren, så en placering længere fra indbrudstyven kan i stedet benyttes.

Fjernbetjeningerne kan endvidere aktivere alarmsystemets panik funktion, og kan med fordel placeres steder hvor en panik aktivering muligvis skal bruges. Dette kan eksempelvis være soveværelse, hvis man eksempelvis vækkes ved lyden af indbrud eller på et badeværelse hvor man typisk vil søge tilflugt ved hjemmerøveri, da dette ofte er den eneste dør i huset med lås på.

SafeHome Trådløse fjernbetjening er tilmeldes nemt og hurtigt alarmsystemets kontrolpanel.

## Features / KSP

- Arm and disarm you alarm remotely
- Set systemmode for Alarm, Alert and Home
- Activate Panic function
- Electronic pairing with alarmsystem
