

## 3.5" Digital Door Viewer

- Takes photo of visitors when doorbell is pressed
- Records video when monitor is pressed
- Storage on MicroSD

Details on the back. All manuals included.

### Who is knocking on my door?

Whether you are home or away from your home or office, the SafeHome Digital Doorviewer will snap pictures or record video.

With builtin LED IT night light, the Digital Doorviewer also works during the night.

## Digital Door Viewer Motion, 3,5"

Doorbell • LCD color monitor • microSD storage • video/photo • motiondetector

With the SafeHome Digital Doorviewer, you can always see who is on the other side of the door before you open it! Choose freely between the video or camera setting – so, who visited while you were away?

The system consists of two units connected by a cable - a doorbell and a monitor. The doorbell unit is mounted on the outside of the door and is equipped with IR night light and camera. When a guest presses the doorbell the unit automatically snaps a picture and stores it on a microSD card. The other unit is the monitor which is mounted on the inside of the door. When the doorbell is pressed, the monitor is automatically turned on, enabling residents of all heights to view the outside area before choosing to open the door.

By pressing the button of the monitor, a videoclip can be recorded of the outside area. All pictures and videoclips are stored on a microSD card (not incl.) in the monitor. This storage can also be reviewed when residents return to their home.

Med SafeHome Digital Dørspion, kan du altid se, hvem der står på den anden side af døren, før du åbner. Vælg mellem video eller foto indstilling – så, hvem var på besøg, da du ikke var hjemme? Systemet består af to enheder forbundet med kabel. En ringeklokke med indbygget kamera og en skærm. Ringeklokken med kameraet monteres på ydersiden af døren og er udstyret med infrarødt LED til at lyse i mørke. Når en gæst trykker på ringeklokke, tages der automatisk et billede, der lagres på microSD kort.

Den anden enhed er skærmen, som er monteret på indersiden af døren. Når dørklokken benyttes, tænder skærmen automatisk og gør beboere – i alle højder – i stand til at se, hvem der står udenfor før døren åbnes.

## Features / KSP

- Digital Doorviewer with doorbell
- Photo and video
- Storage on microSD
- LED - Infrared night light
- For door thickness: 35-65 mm

## Tech specs

- LCD monitor: 3,5", color
- Camera: 2 MP
- Picture: JPEG, 1280 x 960 pxl.
- Video: AVI (640x480, 30fps)
- Video (duration): Adjustable
- Dimensions (mm):  
Indoor: 115/83/30 // Outdoor: Ø70
- Doorbell sound (Indoor): 1W
- Batteries: 3 x AA Alkaline, 1,5V (not incl.)

## Packing specs

- Giftbox
- 4 language (UK, DK/SE/NO)
